

ABSTRACT OF THE DISCLOSURE

The present invention relates to a cosmetics case for storing cosmetics such as liquid lipstick and/or foundation and forced
5 discharging the cosmetics as it needs, more particularly, a cosmetics case comprising an upper movable part 20 and a case body 10, the upper movable part 20 coupled to a cap 60 at top portion thereof while the case body 10 mounted with a plug 50 at bottom portion of the case body, wherein the case has a piston 49 screw-
10 coupled to a screw rod 40 inside the case body and a spring 42 and a reversing ball 43 mounted inside an inner hole 41 formed on top end of the screw rod 40 so that, depending on the case body 10 rotating in normal/reverse directions, the piston 49 goes up and comes down and presses on the reversing ball 43 to make the inner hole 41 to be
15 opened/closed, thereby free controlling discharge and isolation of liquid cosmetics 100.
